TROUBLESHOOTING

If remote is not working:
Press the key for the function you are using (example: Press the TV button) and try again.
Make sure the Set Top Box is plugged in, and there is a clear path between the remote and the Set Top Box.
Check and make sure the batteries in the remote control are not weak or dead.

For TV problems:
Make sure all components and cables are properly connected and plugged in.
Press the TV button, then press the POWER button on your remote.
Make sure TV is tuned to the proper output channel (cable = 3 , or a video input if using yellow/red/white cables).

If Set Top Box does not work:
Press the CBL button on the remote, then press the POWER button. (Be sure to press the TV button on the remote after testing - so the remote will control the TV).
